

```
std::iterator< std  
::bidirectional_iterator  
_tag, const LinkedListNode  
< T >, std::ptrdiff_t, const  
LinkedListNode< T > *, const  
LinkedListNode< T > & >
```

```
LinkedList< T, Allocator  
>::const_iterator
```

A blue arrow points from the `LinkedList< T, Allocator >::const_iterator` box on the right to the `std::iterator` box on the left, indicating that the iterator class inherits from the container's const\_iterator.
