

```
std::iterator< std  
::forward_iterator_tag,  
const LinkedListNode  
< T >, std::ptrdiff_t,  
const LinkedListNode< T  
> *, const LinkedListNode  
< T > & >
```

```
LinkedList< T, Allocator  
>::const_iterator
```

A blue arrow points from the `const_iterator` member of `LinkedList` to the `std::iterator` template arguments, indicating that `LinkedList::const_iterator` is used to satisfy the requirements of `std::forward_iterator_tag`.
